ISSUE: 11 (January, 2022)

## ED CRIN's New Year Greetings To All

The start of a new year can be a very moving experience. It's a time when we reflect with gratitude on the past and set our hopes and intentions for the days ahead. A new year brings not only happiness, it makes us happy with a hope to fulfill our dream or a new beginning of our life. What's more, a new year gives us an opportunity to reinvigorate our enthusiasm for chasing goals and dreams. So, a new year is very special to us in CRIN. Let's all work together to achieve our enviable dream of making CRIN a reputable Institute. In the words of Eleanor Roosevelt: "the future belongs to those who believe in the beauty of their dreams." We believe in a new CRIN and we will achieve it! – Dr. Patrick Adebola.

## Repositioning CRIN As A One-Stop-Shop Solutions to Agric. Problems

The Executive Director (ED) of CRIN, Dr. Patrick Olusanmi Adebola, is an exemplary Nigerian who has demonstrated how living can still be meaningful when

life is lived with purpose and integrity. Understanding that no meaningful life can be built on an easy street, he made up his mind to drive his experience and competence with an uncommon audacity and high standards when he was appointed as Chief Executive Officer of CRIN on October, 2020. Today, just a year as the ED CRIN, Dr. Adebola has recorded commendable achievements which are gradually transforming the Institute from the old narratives.

Propelled by a patriotic desire to rebuild and reposition CRIN, he did not waste time before adding flesh to his ideas through an effective implementation of policies which have achieved industrial harmony at the Institute. This has made it possible for him to re-focus the staff towards achieving the mandate of CRIN. Explaining what he has done to reset CRIN to the path of glory, Dr. Adebola noted that "CRIN was always making the news for wrong seasons many years before I came in as the ED, and that somehow affected its core research mandate. There was industrial disharmony and infighting, and incessant strike and other issues. Therefore, the first agenda I tackled was the existing labour crisis. I was able to achieve industrial harmony and boosted the staff morale by operating an open-door policy while paying substantial part of arrears I met. I also reconstituted a management team

# CRIN Herald

A MONTHLY PUBLICATION OF COCOA RESEARCH INSTITUTE OF NIGERIA (CRIN), IBADAN.

through which I brought everybody on board, I have maintained my neutrality and we have been having interactive sessions which allowed everybody to bring his ideas and suggestions to the table. I have gained the confidence of the staff. Furthermore, I did my best to re-instill the culture of research back to the Institute, and redeemed its battered image. With the achievement of these, we are now looking at ways to increase the internally generated revenue of the Institute so that we can reduce the funding gap which has been affecting operations and causing industrial strikes.”

In his words, “I have gone out to reach people in Abuja and everywhere to source funds with which we have been executing our programmes,

part of which is staff training which cuts across the senior and junior cadres. Before now, most of these staff have not gone for any training since they joined CRIN. Apart from this, we organized retreat for senior management staff through which we brainstormed and calm nerves. I have also started the facelift of the dilapidated infrastructure; the administrative office complex was renovated, our Flavour Quality Laboratory was resuscitated, we are working on our fermentary, and the construction of the Institute’s perimeter fencing is ongoing. Solar light has been put in place among other things we have done. Meanwhile, all I have achieved so far could not have been possible, without the support of the Alhaji Abdulahi Jao-led Board, and the cooperation of the staff. These policies and projects are changing CRIN for the better”.

## ED Advocates CBN’s Intervention To Boost CRIN Research Efforts

The ED CRIN, Dr. Patrick Adebola, has advocated the Central Bank of Nigeria’s (CBN) intervention towards boosting research efforts in the Institute. Featuring on Channels Television Program, repeated on NTA Channel 251, hosted by the CBN Initiatives, the ED appreciated the efforts of the CBN towards assisting cocoa farmers in the country. He opined that for a lasting and sustainable cocoa production, the Institute must be empowered towards the production of improved hybrid cocoa seedlings. We have the technical expertise, but are limited by inability of funds. The CBN’s intervention, through provision of grants, will enable CRIN to reach millions of farmers in Nigeria with hybrid cocoa. Our training acumen on good agricultural practices will assist the farmers to produce safe cocoa, without pesticide residues, for local and international consumption. With our equipped Flavour Quality Laboratory, we are better positioned to ensure good chocolate flavor of international standard. Financial support by CBN to CRIN will go a long way in achieving President Muhammadu Buhari’s vision towards jobs creation, substantial increment in agricultural outputs, youth and women empowerment, and economic development of Nigeria.

## CRIN Distributes Cocoa Hybrid Seedlings To Cocoa Farmers

In demonstration of the Corporate Social Responsibility of the Institute to cocoa farmers in her environment, both in the Headquarters, Ibadan and the Substations, the Institute

in partnership with Federal Ministry of Agriculture and Rural Development (FMARD), embarked on the distribution of cocoa hybrid seedlings to farmers. The process of raising the seedlings began in November, 2020, when the Production and Substation Department of the Institute, headed by a Director, Dr. Moses Ogunlade, was mandated to produce cocoa seedlings for distribution in 2021 season. The project was in different phases starting with the clearing of shade nets and filling of top soil into polythene bags, planting, sorting and maintenance of the seedlings. The success of the project is not unconnected with the dogged managerial ability of the Executive Director, Dr. Patrick Adebola. Also worthy of commendation is the commitment and dedication of the entire staff of Nursery Section as well as the coordinating efforts of the Director, Plantation and Sub-Stations. Over 300,000 seedlings were distributed and the States that benefited from this gesture were Osun, Ogun, Oyo, Kwara, Ondo, Ekiti, Kogi, Edo, Delta, Anambra, Abia, Akwa Ibom and Cross River. The representatives of Cocoa Farmers Association of Nigeria (CFAN), Cocoa and Plantain Farmers Association of Nigeria, Cocoa Association of Nigeria (CAN), Multipurpose Cooperative Unions, Ministries of Agric. and Tree Crop

Units of States were on hand to take the delivery of the hybrid cocoa seedlings.

## Training on Cocoa Processing For Quality Flavour

A week long in-house panelist training was organized on flavour analysis and post-harvest clonal fermentation by the Institute from November 29 to December 5, 2021. The resource person was Mrs Dorine Kassi, a consultant to the World Cocoa Foundation (WCF) on cocoa flavour quality training. It was a hands-on training that encompassed the harvesting of quality cocoa pods, breaking and fermentation of the beans under a natural shade, drying on raised platform and sensory analysis. The programme was geared towards entrenching right practices among cocoa farmers in order to enhance quality cocoa flavour.

## ARCN News

### NSPRI's New Administrative Building in Ibadan Commissioned

The Nigerian Stored Product Research Institute (NSPRI) got her admin. building commissioned on Tuesday 7th December, 2021 at her Station in Onireke adjacent to Ibadan North West Local

Government Area (LGA) Secretariat, Ibadan. The commissioning had in attendance the Hon. Minister of Agriculture ably represented by the Executive Secretary, Agricultural Research Council of Nigeria (ARCN), Prof. Garba Hamidu Sharubutu mni, Chairman of Ibadan North West LGA, Alhaji Abdul Rahmon Olanrewaju, Executive Director (ED) of NSPRI, Dr Patricia Pessu, ED CRIN, Dr. Patrick Adebola and other EDs of Agricultural Research Institutes and Provost of Colleges of Agriculture situated in Ibadan metropolis.

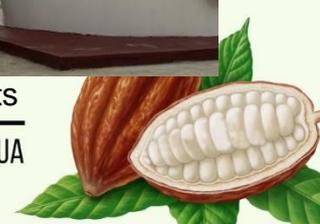

ES, EDs and Provost at the commissioning

In his keynote address, the Hon. Minister of Agriculture stated that agriculture is a cardinal

program of President Muhammadu Buhari's administration and it's one of the core legacies that the president is keen to leave behind. He stressed that NSPRI has the national mandate to research into post-harvest food preservation in Nigeria, therefore, there is need to establish offices across the length and breadth of this country given the diverse economic potential of each region. He also pointed out that NSPRI is an institution that combines the desire of all sectors of agricultural development specifically in the area of production loses in terms of diseases and pests, and post-harvest loses in the areas of harvest, transportation and storage. The twin effect of these has a daring consequence on the livelihood of the farmers, the economic wellbeing and their health status as well as the production indices in the country. While adhering to the principle of President Muhammadu Buhari's agricultural policy of growing what we eat and eating what we grow, the minister is concerned with the likely devastating effect food spoilage can cause to human and the environment, hence, one of his challenging tasks is to ensure safety of human, animal and the environment through effective preservation of agricultural products and provision of quality food.

NSPRI's New Administrative Building

The minister believed that the new structure commissioned will not only provide a conducive working environment, but will serve as an impetus to engage and collaborate more with other stakeholders. This will reflect very positively in the fortunes and well-being of farmers and the overall agricultural value chain, and ultimately by enhancing food security.

## Foundation Laying of CRIN Market

The foundation laying ceremony of CRIN/Idi-Ayunre market was done by the CRIN Executive Director (ED), Dr. Patrick Adebola on Monday 6th December, 2021.

The Institute, under the able leadership of Dr. Adebola, provided a space of about 2 acres within CRIN to be used as market by the host communities. The Idi-Ayunre community's spokespersons took turns to pour encomiums on the ED for the outpour of his milk of human kindness towards the well-being of the community. It was a landmark ceremony that attracted interest groups from the nooks and crannies of Oluyole Local Government Area and market leaders in Ibadan and Oyo State at large. The occasion was graced by paramount rulers of the community and her environs such as Baale of Odo-Ona Nla, the host community - Suara Bello and Timirisiyu Bello; Alaba of Abanla, Oba James Olugbenga Sodiya and Sodiya Olumakon of Ogunmakin. Notable market leaders among whom were Babaloja General of Oyo State, Alhaji Chief Asiwaju Yekini Abass Oladapo, ably represented by Alhaji Chief Yisau Kolayode; Iyaloja General of Oyo State, Omoba Asisat Folasade Abeo-Nurudeen; Iyaloja of Ibadan, Alhaja Iswat Oyinlola Abiola Ameringun, graced the occasion. Other dignitaries present were Chief Imam Abdul Azeez Olaniyan, Lady Evangelist Abigail Aimakhu, Hon. James Adeleke and representative of Hon. Olasumbo, the

immediate chairman of Oluyole Local Government Area. The Oyo State Association of Traders in Nigeria (OYSATRIN), Nigerian Youth Traders Action Council International (NYTACI) and security outfits such as the Nigerian Security and Civil Defence Corps and Agbekoya Solidarity Movement in Nigeria were ably represented at the event.

## IPPIS Staff Data Capture Holds In CRIN

The Integrated Personnel Payroll Information system (IPPIS) data capture of the staff of the Institute held on Thursday 9th December, 2021. This exercise, which was geared towards the update of IPPIS database with the details of the staff in the Federal Government payroll in Nigeria, drew the staff from Ajassor, Ibeku and Uhonmora Substations of the Institute to the Headquarters in Ibadan. The data capture of the staff at the Owena Substation of the Institute was earlier effected on Monday 6th December, 2021, while the exercise at the Ochaja and Mambilla Substations is to be scheduled at a later date. Three centres: Lawrence Opeke Conference Hall, the Committee Room and the Events Centre in the Institute were designated for the exercise at the Headquarters. The programme lasted for almost twelve hours as the IPPIS staff made spirited efforts towards the early completion of the programme. The Executive Director, Dr. Patrick Adebola, was on hand to ensure the smooth running of the exercise.

Ajassor Substation Staff from Cross River State pose for picture with the ED after the IPPIS data capture

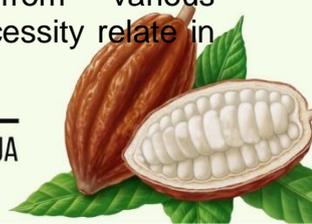

It is noteworthy that the Substations' staff were very delighted to meet the ED for the first time. The ED admonished them to continue their good works of representing the Institute well in their respective Substations.

## 51st ANNUAL ACCOUNTANTS' CONFERENCE

The Institute of Chartered Accountants of Nigeria (ICAN) held its 51st edition of Annual Accountants' Conference at International Conference Centre and Sheraton, Abuja between 29 November and 03 December, 2021. The conference brought

together about seven thousand accountants and other professionals from various industries, both from public and private sectors. The Institute was ably represented by the Ag. Head, Internal Audit, Mr. Kuforiji O. Emmanuel. The theme of the conference was 'trust in governance'. In attendance at the conference were Dr. Akinwunmi Adesina, President AfDB, Mrs. Obiageli Ezekwesili and other erudite speakers. As culled from the presentations at the conference, by Mr. Kuforiji, investors' confidence counts in private capital flows to nations. The value chain of capital attracted through private capital flows will impact the economy and GDP of nations that have attracted them. Furthermore, global economy continues to face trust deficit. According to OECD, only 51% of citizens trusted their government in 2020. Also, 2020 edelman trust barometer reveals that none of the societal institutions that the study measures – government, business, NGOs and media are trusted. He concluded by stating that all hands should be on deck to heighten positive trust indicators in every leadership and facet of government. With relevance to CRIN, Mr. Kuforiji opined that research is pivotal to the development of any nation. An effective and result oriented research cannot thrive in an environment of distrust. From conception through to execution, every research project is a consolidation of inputs from various stakeholders who must of necessity relate in trust at every stage.

# CRIN Herald

A MONTHLY PUBLICATION OF COCOA RESEARCH INSTITUTE OF NIGERIA (CRIN), IBADAN.

Every unit leader must work hard and transparently enough to earn the trust of officers under him/her and vice versa. Every Departmental leader must work hard and transparently enough to earn the trust of officers in his/her Department and vice versa. If this trend is observed and sustained within the organizational structure, we would not only achieve our organizational goals, we shall be sending the right and proper signal to the nation at large. In a modern day data driven environment, trust is sine qua non to data and information protection and utilization. Distrust will sure cause distortion to research processes and results, to say the least. Mr. Kuforiji appreciates the ED, Dr. Patrick Adebola, for the permission and financial support to attend the conference. He noted that this is the first time a CRIN accountant will enjoy this privilege, therefore, he advocated that this privilege be extended to his colleagues in subsequent conferences.

## Internal Audit Celebrates end of year get-together

Internal Audit Division Staff, in a self-financed get-together, celebrated a happy ending of the outgoing financial year. The colourful event took place at the Institute's rest house on Thursday 16 December, 2021. The ED, Dr. Patrick Adebola, received an award from the Division for his ground-breaking achievements in the Institute, having spent just a year in office.

## PhD Defense: Dr. E. F. Mapayi

Congratulations to Dr. Elizabeth Folashade Mapayi for successfully defending her PhD thesis on the "Development of an Efficient Tissue Culture - Based

Cocoa (*Theobroma cacao* L.) Regeneration System" at the Department of Plant Breeding and Seed Technology, College of Plant Science and Crop Production, Federal University of Agriculture, Abeokuta (FUNAAB) on 30th November, 2021. Her study aimed at developing a cacao *in vitro* regeneration system through somatic embryogenesis. The floral parts, petal and staminode explants from twelve *T. cacao* genotypes were tested for their abilities to regenerate and develop somatic embryos at different physiological ages. Also, the genetic integrity of the cocoa genotypes was tested through somaclonal variation assessment as detected by SSR markers. Her findings revealed that the *T. cacao* genotypes examined were highly embryogenic. The study concluded that embryogenic capacity of floral explants in *T. cacao* is suggestive of the effects of genetic factors and physiological developments of the callus. The development of *in vitro* regeneration system through somatic embryogenesis method adopted for the study proved to be highly efficient and, therefore, recommended for the genotypes examined under this study. Once again, hearty congratulations to Dr. Elizabeth F. Mapayi. More wins!

## Staff of the Month: Mr Omitade Omoniyi Oluseyi

Mr. Omitade Omoniyi Oluseyi was born on February 1, 1967 to the family of Mr. Samuel Ogunranti Omitade. He had his elementary education at CRIN Staff School, Idi-Ayunre Ibadan. He attended ABE Technical College

Odo-Ona Elewe Ibadan, Oyo State where he obtained West African School Certificate in 1985. He later proceeded to Kola Signs Studio Ekotedo, Ibadan where he obtained Diploma in Sign Writing and Screen Printing. Subsequently, he worked with the Quality Control Department of the Nigerian Wire and Cable, Ibadan from 1990 to 2000. He worked as a casual staff with the Institute from 2000 to 2003 in Zone 6 under the zonal leadership of Mr. Olorunmota and Mr. Tunde Akintoye. He was staffed by the Institute as security guard in June 2, 2003. In furtherance of his academic career pursuit, he proceeded to the Federal College of Agriculture Moor Plantation, Ibadan where he obtained National Diploma (ND) in Agricultural Technology and HND in Crop Production on part-time basis. He was converted to Assistant Agricultural Superintendent in 2016 and posted to the Plantation and Estate Management (PEM)/Ground Maintenance Section. He was later redeployed to Farming System Research (FSR) Department, where he serves currently in Agricultural Superintendent cadre. At the course of the discharge of his duty, he has established and maintained experimental plots and mentored scores of interns. Mr Omitade is highly industrious, respectful and deeply committed to his assignment with minimal supervision. He is happily married with children.

## Niger State College of Agriculture Students Visited CRIN on Excursion

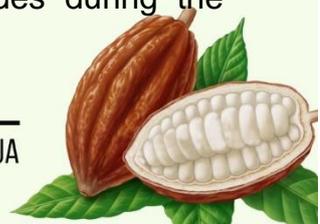

The students and staff of Niger State College of Agriculture, Mokwa were on excursion to the Institute on September 29, 2021. According to the Head of Department (HOD), Engr. Mohammed Jiya Mamman, that accompanied the students, CRIN was one of the other research Institutes in Ibadan that was penciled down for excursion. In his remarks, the visit to CRIN afforded the students, most of whom had never set their eyes on cocoa pods, the opportunity not only to see cocoa but to be trained on grafting. The HOD expressed his appreciation of the research innovations in the Institute and the structures on ground.

The students were excited and satisfied after training on cocoa grafting techniques.
