### **CRIN TO PRODUCE 10 MILLION COCOA SEEDLINGS FOR** 2017/2018 PLANTING SEASON

The above directive was given by the Honourable Minister of Agriculture

Ag. ED with the Honourable Minister of Agricuture at 42nd NCARD meeting

(HMA) to the Ag. ED CRIN, Dr. O. Olubamiwa at Port Harcourt on 27 April 2017. It was at a brief meeting with Chief Audu Ogbe, the HMA, during the 42nd Session of the National Council on Agricultural and Rural Development (NCARD). The NCARD Session 42 was held in Port

Harcourt from Monday 24 to Thursday 27, 2017.

CRIN was directed to bring a proposal as soon as possible for the consideration of the HMA. According to the HMA who spoke with passion, that Nigeria is now 7th world cocoa producer is unacceptable. Nigeria must increase production and push her position higher.

CRIN BreakingNews April 2017 Edition

## CRIN PRESENTED A PAPER AT NIPPIS and Directors from both **SENIOR EXECUTIVE COURSE 39**

The National Institute for Policy and Strategic Ministries. There were Studies (NIPSS), Kuru, near Jos is indeed a also a Professor from the strategic Institution of Nigeria. The Ag. ED of Premier University and CRIN had a one-day experience at the Institute on Customs and Immigration the 10th of April, 2017. He described NIPSS as "a officers. strategic knowledge factory for Nigerian leaders."

Senior Executive Course 39 (SEC 39), a 10-month course which started in February, 2017 will end in November, 2017. According to the Ag. ED, CRIN, "If in one day someone is loaded with so much knowledge as this, then in 10 months, one would have transformed into a guru in fundamental knowledge of our country." Participants of the SEC are top officials drawn from both the Private and Public Sectors. They include Military, Para-Military and Civilian Personnel. The 66 participants of SEC 39 include a Major General, a Brigadier General, Colonels, Air Force and Naval Offcers, and a Police Commissioner. Others are Permanent Secretaries

the Federal and State

The Ag. ED presented a paper titled "The Impact of Science, Technology and Innovation on Cocoa Production in Nigeria." The paper was at the instance of NIPSS and came up amidst 5 others from the NARIs on 10th April, 2017. There were two sessions each of about  $2^{1/2}$  hours including the interactive Question and Answer aspect. In the first session were IAR, Zaria; NRCRI, Umudike and NIHORT, Ibadan. The second session featured CRIN, Ibadan; RRIN, Benin City and NCRI, Pategi. Each NARI spoke on the specific mandate crop(s).

### The Ag. ED CRIN's presentation had the following facts:

- Simplified explanation of STI •
- A brief history of CRIN and her mandates ٠
- A brief history of the Nigerian Cocoa
- Impacts of STI on Cocoa Agronomy, Breeding, Pest/Disease, Value Addition, Soil and Plant Nutrition, etc.

# **CRIN BAKERY UPGRADED WITH MODERN EQUIPMENT**

#### Sophisticated modern equipment have been lately installed at CRIN Bakery.

They include a spiral mixer, dough divider, dough molder, dough proofer, digital deck oven and bread slicer. Other auxiliary equipment are digital weighing scales, heat extracting machine, water

pumping machine, stainless steel tables and trays, baking pans, etc. The advantage of the modern equipment is that the bread production time will reduce from 10 to 3

Modern Bakery Oven

hours. Also there can be continuous batch production of bread and therefore

The reconstruction of the bakery building to the required standards of NAFDAC is ongoing and the project is being

monitored by both the NAFDAC consultant and the Institute bakery consultant.

increased production.

The contractor handling the project promised to complete the work by the end of April, 2017. The issues of NAFDAC registration and designing of CRIN Cocoa bread customized packaging nylon are also ongoing.

All the aforementioned success were recorded because of the visionary leadership of the Ag. ED who has promised to significantly improve the generation of IGR by CRIN.

## CRIN/EKITI STATE ON-GOING COCOA ROOT STOCK PROJECT

A four man team led by Dr. S. O. Ogunwolu (Head, Production and Substations Department) left the Institute on April 14, 2017 to the Ministry of Agriculture and Rural Development(MARD), Ekiti State to monitor and evaluate the extent of work done on cocoa root stocks raised by CRIN Nursery workers for the state.

The team commended the nursery workers for the good work done. All the 10,000 root stocks raised are in good condition and are ready for vegetative propagation. Also, It was discovered that the three locations designated for the establishment of the clonal materials have been cleared by Ekiti State while selective felling of trees have been done. In readiness for irrigation activity, the state had sunk two wells per

CRIN Team with the Oniye of Ive-Ekiti

hectare on each site and have also acquired sprinkler equipment for watering.

The team payed a courtesy visit to the Oniye of Iye-Ekiti, Oba Jonathan Adeleye Oni, and the Chairman, Ileje-Meje Local Government Area, Ekiti State. The State Government's representative, Mr. J. K. Ajavi (Director of Produce and Tree crops Unit, MARD) was also in attendance.

Dr. Ogunwolu on behalf of CRIN management appreciated the efforts of

the king and the Local Government Chairman and all the people of Iye-Ekiti for contributing immensely in controlling fire outbreak that would have destroyed the cocoa rootstocks in the nursery.

The following members of staff were in attendance on the trip:

Dr. O.O. Ogunwolu, Dr. (Mrs.) A. A. Muyiwa, Dr. (Mrs.) Tosin Adeigbe and Mr. Odedele Samson.
